

Headaches? Migraines?

(We can help quickly and easily with the NTi-TSS)

New information on migraine and headache tells us that 82% of migraine sufferers can expect a 70% decrease in pain with the proper use of a simple dental device.

How? Hyper-activity of the jaw muscles causes the mandibular branch of the trigeminal nerve which feeds and senses these muscles to produce chemicals which inflame the blood vessels of the brain and skull. These inflamed blood vessels become dilated (stretched open), irritated, and extremely painful. So:

Muscle hyperactivity → Inflames nerves → Inflamed blood vessels → Pain

A simple dental device, the NTi-TSS, can eliminate 75% of this muscle hyper-activity and often remove the root cause of the migraine pain. Even non-migraine headache pain is largely muscle-contraction pain, greatly reduced by the appliance.

To check this out, let us see you when you have taken no headache medications and you can tell that you are in a headache-prone condition. If a headache or migraine is beginning, give us a call during office hours to get you in as soon as possible; a quick, inexpensive office consultation can give you some answers. Also check out the information on the web at:

What Would You Do With \$100.00?

We have long known that our best patients come to us through referrals from you who know and value our care and services, so rather than pay for external marketing, we would prefer to reward our friends.

However, in this busy world with so many competing challenges for your attention, we may not be "top of mind". Here is an idea to keep us fresh in your mind and to thank you for your valuable referrals.

For each adult patient you refer who completes an initial visit and comprehensive new patient exam by December 31, 2006, you will receive our thanks and \$100.00. You simply tell us whether you wish to receive this token of our appreciation as:

- 1) credit on your account,
- 2) a check mailed to you, or
- 3) cash in your hand..... and it's yours!!!!

It's that simple.

We appreciate the confidence and trust you show in us by referring your family and friends. We can help them with brightening their smiles, headaches, sleep problems and comprehensive dentistry.

Warmly, *Dr. Bob Finkel & Staff*
